

COVER LETTER

I am excited to apply for the post of Software Engineer – Product Development

At Confident Electronics Pvt. Ltd., I worked as an Application Developer, developing UIs in QT Platform.

While employed at Aeronautical Development Agency (ADA), I've honed my skills doing programming in C and C++ in Qt Platform. While employed here, I have also used Linux terminal commands extensively for various projects. Apart from Application Development, I was also involved in project debugging, testing and analysis.

At Harman Connected Services Pvt. Ltd., I worked on **Software Testing (Smoke, Sanity and UNECE) of the developed software (after every release)** using multiple test cases for AudiSCON and HPE project – including **detailed testing of Android Auto and CarPlay features**. I was also involved in SWE.5 test case execution for multiple test cases. I have also worked on Python scripting along with testing and execution of scripts for automation.

I'm confident that my proven track record of excellent work ethic, knowledge of C, C++ and Qt Platform, with an experience in Software Testing (including **Android Auto and CarPlay**), will make me a valuable asset at your company, and allow me to contribute to the team's success.

I am highly looking forward to the position of Software Engineer at your Company. I'm available for discussion at your convenience.

Thank you.

Sincerely,

Ganesh Raghunathan
